Project Green Case Study

EU-Matic and Angela Mono

<p>Quote from business: (how you heard about Project Green, what difference the graduate has made, has it been a good experience, has it changed your views of employing graduates?)</p>	
<p>Quote from graduate: (how you heard about Project Green, how will it help your career – the academic credits and the placement, have you enjoyed the project?)</p>	<p>"I heard about project green from a University classmate who's already working in the environmental sector. The project has really boosted my aspiration for environmental management after waiting for two years to practice in a real working environment. I feel more confident now in applying for further roles in this area. I had an MSc Environmental Management certificate but I needed work experience and Eu-Matic has been the best place for me in providing a vital experience in the area of waste recycling, environmental auditing, EMS and skills in project management." Angela Mono</p>
<p>Project Cost/Saving:</p> <p>Estimated savings from graduate salary: £'s</p> <p>Estimated potential benefits to business:</p> <p>Estimated sum of potential benefits to business: £'s</p>
